INDEX TO VOLUME XXXVII.

A

Abbott, F., notes on η Argus, 294.
Academy, American, proceedings of, 156, 450.
National, proceedings of, 446.
Philad., Journal of, 156.
Proceedings of, 156, 449.
at Paris, prizes offered, 443.
Address by President of Royal Society, 100.
African explorations, 87.
Agardh, J. G., Species, Genera et Ordines Algarum, 286.
Alloys containing tungsten, *Caron*, 118.
Almanac, National, and Annual Record, notice of, 448.
Aluminum and aluminum-bronze, *I. L. Bell*, 133.
Amber-fauna, Diptera of the, *Læw*, 305.
Amherst College, Reminiscences of, by *E. Hitchcock*, notice of, 148.
Amphibians, position of, among Vertebrates, *J. D. Dana*, 184.
Andersson, N. J., on the botany of the Galapagos Islands, notice of, 436.
Anilin purple, *Perkin*, 413.
Animal substances, *Pasteur* on preservation of, 440.
Anthropology, Waitz's Introduction to, notice of, 149.
Antimony in Canada, 405.
Antiquity of Man, 3d appendix to Lyell's, notice of, 432.
Argentine Confederation, explorations in, 88.
Astronomy:—
Celestial dynamics, 187.
Comet IV, 1863, 292.
V, 1863, 293.
VI, 1863, 293.
Density, rotation and relative age of the planets, 36.
Eurynome (79), 140, 147.
Nebulæ, recent researches on, 198
Nebulous matter, invisibility of, 210.
Notes on η Argus, 294.
Orbits of binary stars, 233.
November meteors, *Twining*, 141.
November star-shower in former times, original accounts of, *Newton*, 377.
Star-showers, 445.
Attfield, spectrum of carbon, 408.
Australian explorations, 84.
Aviculidæ, *F. B. Meek*, 212.

B

Bahr, on wasium, 116.
Barker, G. F., on casting of 20-inch gun at Pittsburgh, 296.
Barometer as an indicator of earth's rotation and sun's distance, *P. E. Chase*, 409.
Bell, I. L., on aluminum and aluminum-bronze, 133.
Berlin Chemical chair vacant, 147.
Binary stars, *D. Kirkwood*, 233.
Bliss, P. C., explorations in S. America, 88.
Blowpipe beads, crystals in, *G. H. Emerson*, 414.
Blyth's new edition of Liebig's Chemistry, notice of, 135.
Boott, Francis, obituary of, 288.
Boston Soc. Nat. Hist., Journal of, 447.
Proceedings of, 449.
Botanical necrology for 1863, 288.
Botanical works, etc., notices of:
Agardh, Gen. et Ord. Algarum, 286.
Andersson, Galapagos Islands, 436.
Brunet, Plantes de Michaux, etc., 286.
Cosson & G. de St. Pierre, Flore des environs de Paris, 434.
Dawson, on flora of the Carboniferous, 419.
Harvey, Phycologia Australica, 286.
Kindberg, Monographia gen. Lepigonorum, 435.
Lyall's plants of British America, 287.
Martius, Flora Brasiliensis, 283.
Miquel, Annales, &c., 281.
Müller, Plants of Victoria, 286.
Prior, Popular names of British plants, 433.
Tuckerman, Lichenes Insulæ Cubæ, 436.
Vilmorin-Andrieux, Des Fleurs de Pleine Terre, 437.
Botany:—
Coriaria thymifolia, 287.
Gaultheria, origin of the name, 287.
Germination affected by ozone, &c., 373.
Gymnosperms, structure of flowers in, 284.
Ink plant, 287.
Nomenclature, 278.
Brush, G. J., mineralogical abstracts, 270.
on dechenite and arseoxene, 270.
göthite from Lake Superior, 271.
tephroite, 67.

C

Cæsia, crystals of tartrates of, *J. P. Cooke, Jr.*, 70.
California Geological Survey, reports on, *J. D. Whitney*, 82, 427.
Canada, mineralogy and geology of, by *E. J. Chapman*, notice of, 432.
antimony mine in, 405.
Cappocci, obituary of, 304.
Caron, on alloys containing tungsten, 118.
Celestial dynamics, *J. R. Mayer*, 187.

Cephalization, classification based on, *J. D. Dana*, 10, 157.
Chambers' Encyclopedia, notice of, 302.
Chapman, E. J., notice of work by, on mineralogy and geology of Canada, 432.
Chase, P. E., on the barometer as indicator of earth's rotation and sun's distance, 409.
Chemical Chair in Berlin, 147.
CHEMICAL WORKS, notices of:—
Bloxham's Medical Chemistry, 302.
Miller's Elements, 135.
Liebig's Chemistry, 135.
Stover's Dictionary of Solubilities, 301.
CHEMISTRY:—
Arseniuret of hydrogen, 117.
Cæsia and rubidia, tartrates of, 70.
Carbon, spectrum of, 408.
Cerium, separation of, from yttrium, etc., 354.
Columbite, 117.
Crystals in blowpipe beads, 414.
Cyanid of phosphorus, 269.
Distillation of substances of different volatilities, 377.
Ethylene, reaction of a sulphid of potassium on bromid of, 390.
Hypermanganic acid and compounds of sesquioxyd of manganese, optical distinction of, 408.
Indium, 269.
Niobic acid, 118.
Nitrogen, determination of, 310.
Nitro-prussid of sodium, action of light upon, 408.
Oxyds, new metallic, 116, 119.
Oxygen, ozone, and antozone, 325.
Platinum-metals, 57.
Potash and soda, indirect determination of, 344.
Silicium, compounds of, with oxygen and hydrogen, 120.
Soda, hydrate of, 117.
relations of hyposulphite of, to certain metallic oxyds, 346.
Sulphuric acid, estimation of, 122.
Thallium, 121.
sulphate of, 117.
Tungsten, alloys of, 118.
Wasium, 116.
See further, *Photography*.
Chloritic minerals, *J. B. Pearse*, 221.
Clark, H. J., Tubularia not parthenogenous, 61.
Classification as based on cephalization, *J. D. Dana*, 10, 157.
Coan, T., on Kilauea, 415.
Coast Survey Reports, review of, 95.
Collier, P., indirect determination of potash and soda, 344.
Comets, see *Astronomy*.
Cooke, J. P., Jr., on crystals of tartrates of cæsia and rubidia, 70.
dry process in photography, 123.
Copper, large mass of native, of L. Superior, 431.
Cosson, Flore des Environs de Paris, by, notice of, 434.
Crafts, J. M., on product of reaction of monosulphid of potassium and bromid of ethylene, 390.
Crystallography, tract on, by *W. H. Miller*, notice of, 148.
Crystals in blowpipe beads, *G. H. Emerson*, 414.
Crystals of tartrates of cæsia and rubidia, *J. P. Cooke, Jr.*, 70.
Czudnowicz, on eusynchite and dechenite, 270.

D

Dana, J. D., on Classification, based on cephalization: Insects, 10; Herbivores, 157.
Embryology in classification, 19, 184.
Insects in geological history, 32.
Carboniferous insects, 34.
amplificate forms, general observations on, 175.
Megasthenes and microsthenes, 181.
Herbivores in geological history, 183.
position of Amphibians among Vertebrates, 184.
Text-book of Geology by, notice of, 143.
Manual of Geology, notice of, revised edition of, 302.
Dawson, J. W., Synopsis of Carboniferous Flora of Nova Scotia, 419.
De Laski, J., on glacial action about Penobscot Bay, 335.
Dennis, W., on theory of tides, 234.
Desert of Sahara, expedition to, 146, 445.
Deville, on permeability of iron, 441.
Diptera of the Amber-fauna, *Læw*, 305.
Distillation of substances of different volatilities, *M. C. Lea*, 377.

E

Earthquakes, theory of, *A. Perrey*, 1.
Electric cable, difficulties in laying, 440.
light, action of, on iodized plate, 207.
Electrical properties of pyroxyline paper and gun cotton, *J. Johnston* and *B. Silliman, Jr.*, 115.
Elevations, see *Height*.
Elliott, D. G., prospectus of a monograph of the Tetraoninæ, 437.
Emerson, G. H., on crystals in blowpipe beads, 414.
Emmons, E., obituary of, 151.
Eurynome, *J. C. Watson*, 140, 147.
Expedition to the Sahara, 146, 445.
Spanish Scientific, 444.
Explorations, see *Geographical Notices*.

F

Falconer, on glaciers of the Himalayas, 273.
Fitz, Henry, obituary of, 149.
French Academy, prizes of, 443.
Frick, J., notice of Physical Technics by, 149.

G

Galapagos Islands, botany of, 436.
Gautier, A., recent researches on nebulæ, 198.
Gay, Jacques, obituary of, 292.
Geinitz, H. B., on organic remains of the Permian, and on the name Dyas, notice of, 432.
two new Permian plants, noticed, 431.

Geographical notices, *D. C. Gilman*, 75.
GEOLOGICAL WORKS, etc., notices of:—
Chapman's Mineralogy and geology of Canada, 432.
Dana's Manual of Geology, 302.
Text-book of Geology, 147.
Hall's Contributions to Paleontology, 137.
Hall on the Crinoids of the Waverly Sandstone, 140.
on the Fauna of the Potsdam, 140.
Geinitz on the Dyas, 432.
Jones, T. R., monograph on fossil Estheridæ, 140.
Lyell on Antiquity of Man, appendix to 3d edit., 432.
Ungers's Geology of Greece, etc., 79.
Whitney's Reports on California, 82, 427.
GEOLOGY and PALEONTOLOGY:—
Carboniferous flora of Nova Scotia, *Dawson*, 419.
insects of Illinois, *Dana*, 34.
Cretaceous and superior formations of West Tennessee, *Safford*, 140.
Diptera of the Amber-fauna, 305.
Glacial action about Penobscot Bay, 335.
among the Himalayas, 273.
in Nova Scotia, 417.
Herbivores, early, 183.
Insects, early, 32.
Laurentian fossils in Canada, 272, 431.
Lithology, *T. S. Hunt* on, 249.
Potsdam fossils, *J. Hall*, 140.
Winchell, 226.
Pteriidæ (or Aviculidæ), *F. B. Meek*, 212.
Volcanoes, see *Volcano*.
Germination as affected by ozone, etc., *M. C Lea*, 373.
Gibbs, W., platinum metals, 57.
chemical abstracts, 116, 269, 408.
physical abstracts, 116, 267.
niobic acid, 118.
relations of hyposulphite of soda, &c., 346.
determination of nitrogen by weight, 350.
employment of fluohydrate of fluorid of potassium in analysis, 335.
separation and estimation of cerium, 352.
Gill, T., review of Holbrook's Ichthyology of S. Carolina, 89.
Gilman, D. C., geographical notices, 75.
Glacial action about Penobscot Bay, *J. DeLaski*, 335.
among the Himalayas, *Falconer*, 273.
in Nova Scotia, *B. Silliman, Jr.*, 417.
Gold, mechanical and chemical treatment of, *J. D. Whelpley*, 401.
processes of extracting, 134.
Grastite, 224.
Gray, A., notices of botanical works, 281, 433.
on nomenclature, 278.
Greece, geology of, *Unger*, 79.
Greg, R. P., on periodical meteors, 445.
Gulick, on Kilauea, 416.
Gun-casting at Pittsburgh, 296.
Guyot's Physical Maps, notice of, 80.

H

Hall, J., contributions to Paleontology by, review of, 137.
Crinoidea of the Waverly sandstone by, notice of, 140.
Fauna of the Potsdam sandstone by, notice of, 140.
Harms, on hydrate of soda, 117.
Harvey's Phycologia Australica, notice of, 286.
Heat, passage of radiant, through rock-salt, *Knoblauch*, 267.
Height of mountains in North America, *Whitney*, 81.
Hemeristia occidentalis, 35.
Henrici, on function of roots, 136.
Herbivores, classification of, *Dana*, 157.
Himalayas, glaciers of, *Falconer*, 273.
Hinrichs, G., on density, rotation, and relative age of the planets, 36.
Hitchcock, C. H., on antimony in Canada, 405.
Hitchcock, E., reminiscences of Amherst College by, notice of, 149.
obituary of, 302.
Holbrook's Ichthyology of S. Carolina, review of, 89.
Hübner, on cyanid of phosphorus, 269.
Hunt, T. S., contributions to lithology, 249.
on Laurentian Rhizopods of Canada, 431.

I

Ichthyology of S. Carolina, review of *Holbrook's*, 89.
Indium, 269.
Ink-plant, *Jameson*, 287.
Insects, classification of, *J. D. Dana*, 10.
fossil, from the Carboniferous, *J. D. Dana*, 34.
of the Amber-fauna, 305.
Irons containing titanium, *E. Riley*, 126.
containing tungsten, 118.
Ivory, vegetable, 445.

J

Jameson, on ink-plant, 287.
Johnson, S. W., on thallium, 121.
chemical abstracts, 122.
notice of Liebig's Chemistry, 135.
agricultural abstracts, 136.
abstract of Meissner's researches on oxygen, ozone, and antozone, 325.
Johnston, J., on pyroxiline paper, 115.
Jones, T. R., on fossil Estheriæ, notice of, 140.
Joy, C. A., on a meteorite from Chili, 243.

K

Kilauea, *T. Coan*, 415.
Kindberg, N. C., Monographia generis Lepigonorum by, notice of, 435.
Kirkwood, D., on orbits of binary stars, 233.
Knoblauch, H., on passage of radiant heat through rock-salt, 267.
Kuestel, G., processes of Gold and Silver extraction, noticed, 134.

L

Lang, V. von, on sulphuret of thallium, 117.
Laurentian fossils from Canada, *W. E. Logan*, 272; *T. S. Hunt*, 431.
Lawrence Scientific School, contributions by, to chemistry, 346.
Lea, I., on genus Unio, notice of, 436.
Lea, M. C., notice of Storer's Dictionary of Solubilities, 301.
on influence of ozone, etc., on germination and vegetation, 373.
yellow coloration of faded photographic prints, 438.
Lesley, J. P., on a petroleum vein in Virginia, 149.
Liebig's Chemistry, notice of new edition of, 135.
Lithology, contributions to, *T. S. Hunt*, 249.
Livingstone's explorations in Africa, 87.
Lœw, on Diptera of the Amber-fauna, 305.
Logan, W. E., on Laurentian fossils, 272.
Lyall, D., botany of British America, 287.
Lyell, C., appendix to Antiquity of Man by, notice of, 432.

M

Magnesium light for photography, 440.
Maps of California, proposed, 82.
Guyot's Physical, 180.
Martens, M., obituary of, 288.
Martius's Flora Brasiliensis, review of, 283.
Maury's Sailing Directions, etc., Report of National Academy on, 447.
Mauve or anilin purple, *Perkin*, 413.
Mayer, J. R., on celestial dynamics, 187.
Meek, F. B., on the Pteriidæ, 212.
Meissner's researches on oxygen, ozone, etc., *S. W. Johnson*, 325.
Meteorite from Chili, *C. A. Joy*, 243.
Miamia Bronsoni, 34,
Michaelson, J. A., on bragite, 272.
Miller's (*W. H.*) Chemistry, notice of, 414.
Miller's (*W. A.*) Crystallography, notice of, 148.
MINERALS:—
Ægirine, 407.
Antimony ores, 405.
Arœoxene, 270.
Astrophyllite, 272.
Bragite, 272.
Chlorite group, 221.
Chromic iron, 358.
Columbite, 117.
Dechenite, 270.
Eudialyte, 407.
Eusynchite, 270.
Göthite, 271.
Grastite, 224.
Kämmererite, 221.
Kermesite, 407.
Native copper, 431.
Paracolumbite, 359.
Senarmontite, 407.
Stiblite, 407.
Szaibelyite, 271.
Tephroite, 67.
Tinstone, 358.
Tungsten, 407.
Vanadinite, 270.
Miquel's Annales Musei Bot. etc., notice of, 281.
Moquin-tandon, C. H. B. A., obituary of, 288.
Mount Hope Nurseries, 147.
Müller, F., Plants of the Colony of Victoria by, notice of, 286.
Müller, J., on wave lengths of spectral lines, 116.

N

Names, popular, of British plants, review of, 433.
National Almanac and Annual Record, notice of, 448.
National Academy, see *Academy*.
Nebulæ, recent researches on, *A. Gautier*, 198.
Nebulous matter, invisibility of, *D. Trowbridge*, 210.
Newberry, J. S., notice of memoir by, on fossil plants of N. W. Boundary, 148.
New metallic oxyds, *Bahr* and *Nicklès*, 116.
Newton, H. A., on original accounts of November star-shower in former times, 377.
Nicklès, J., on wasium, 116.
Nile, exploration of, 75.
Nomenclature in Natural History, *A. Gray*, 278.
Nova cotia, Carboniferous Flora of, *J. W. Dawson*, 419.
glacial action in, *B. Silliman, Jr.*, 417.
November meteors, see *Astronomy*.

O

OBITUARY:—
Francis Boott, 288.
Cappocci, 304.
Ebenezer Emmons, 151.
Henry Fitz, 149.
Jacques Gay, 292.
Edward Hitchcock, 302.
Martin Martens, 288.
C. H. B. A. Moquin-tandon, 288.
Giovanni Plana, 304.
Heinrich Rose, 304.
Christian von Steven, 288.
Wm. J. Taylor, 447.

P

Paleontology, contributions to, by *J. Hall*, reviewed, 137.
See further, *Geology*.
Paris, water works about, 443.
Pasteur, on Pagliari's method of preserving animal substances, 440.
Pearse, J. B., on minerals of the chlorite group, 221.
Penobscot Bay, glacial action about, *J. DeLaski*, 335.
Periodical meteors, *R. P. Greg*, 445.
Perkin, on mauve or anilin purple, 413.
Permeability of iron, 441.
Perrey, A., on theory of earthquakes, 1.
Peters, on szaibelyite, 271.
Philadelphia Acad., see *Academy*.
Philosophical Soc., Amer., 156, 450.
PHOTOGRAPHY:—
Action of electric light on the iodized plate, 207.

PHOTOGRAPHY:—
Dry process, 123.
Magnesium light for, 440.
Yellow coloration for faded prints, 438.
Physical Technics by *Frick*, notice of, 149.
PHYSICS:—
Barometer as an indicator of earth's rotation and sun's distance, 409.
Electrical properties of pyroxiline paper and gun cotton, 115.
Heat, passage of radiant, through rock salt, 267.
Optical distinction between hypermanganic acid and compounds of sesquioxyd of manganese, 408.
Permeability of iron, 441.
Spectral lines, wave lengths of, 116.
Spectrum of carbon, 408.
Theory of earthquakes, *A. Perrey*, 1.
Theory of tides, 234.
Pisani, *F.*, on astrophyllite, 272.
on paracolumbite, 359.
Pittsburgh foundry, casting of a 20-inch gun at, 296.
Plana, Giovanni, obituary of, 304.
Planets, density, rotation and relative age of, *G. Hinrichs*, 36.
Platinum metals, 57.
Preservation of animal substances, 440.
Prior's Popular Names of British Plants, review of, 433.
Prizes offered by French Academy, 443.
Pteriidæ, *F. B. Meek*, 212.
Pyroxiline paper, electrical properties of, *J. Johnston* and *B. Silliman, Jr.*, 115.

R

Reader, The, notice of, 456.
Reich and *Richter*, on indium, 269.
Rhizopods of the Azoic, 273, 431.
Riley, *E.*, on titanium in iron, 126.
Rood, *O. N.*, on action of weak electric light on the iodized plate, 207.
made professor in Columbia College, N. Y., 147.
Roots, function of, *Henrici*, 136.
Rose, *H.*, on columbite, 117.
new series of metallic oxyds, 119.
obituary of, 304.
Rosse, memoirs by, on nebulæ, noticed, 198.
Roussin, on action of light on nitro-prussid of sodium, 408.
Royal Society, 100.
Rubidia, crystals of tartrates of, *J. P. Cooke, Jr.*, 70.

S

Safford, *J. M.*, on Cretaceous and superior formations of West Tennessee, 360.
Sahara, expedition to, 146, 445.
Sailing Directions, *Maury's*, notice of, 447.
Sheffield Laboratory, contributions of, 67, 344.
Shepard, *C U.*, mineralogical notices, 405.
Shooting stars, see *Astronomy*.
Silliman, *B.*, *Jr.*, pyroxiline paper and gun cotton, 115.
chemical abstracts, 116.
Silliman, *B.*, *Jr.*, on glacial action in Nova Scotia, 417.
Society, see *Boston*.
Solubilities, notice of Storer's Dictionary of, 301.
South American explorations, 88.
Spectra, see *Physics*.
Speke and Grant's explorations, 75.
Star-showers, see *Astronomy*.
Steven, Christian von, obituary of, 288.
Stolba, on estimation of sulphuric acid in salts of the alkalies, 122.
Storer's Dictionary of Solubilities, notice of, 301.
Stromeyer, on szaibelyite, 271.
Sun's heat, origin of, *J. R. Mayer*, 187.

T

Taylor, Wm. J., obituary of, 447.
Telegraph cable, difficulties in laying, 440.
Tennessee, Cretaceous and superior formations of, *J. M. Safford*, 360.
Tephroite, *G. J. Brush*, 67.
Tides, theory of, *W. Dennis*. 234.
Titanium in iron, 126.
Townsend, *J. B.*, on a large mass of native copper, 431.
Troost, on permeability of iron, 441.
Trowbridge, *D.*, on invisibility of nebulous matter, 210.
Tuckerman's Caroli Wright Lichenes Insulæ Cubæ, notice of, 436.
Tubularia not parthenogenous, *H. J. Clark*, 61.
Tungsten, alloys containing, 118.
Twining, *A. C.*, on shooting stars, 141, 445.

U

Unger, on geology of Greece, etc., 79.

V

Vegetable ivory, 445.
Vegetation as affected by ozone, etc., *M. C. Lea*, 373.
Verrill, *A. E.*, List of Polyps and Corals, etc., by, notice of, 437.
Volcano of Kilauea, *T. Coan*, 415.
submarine, in the Mediterranean, 442.

W

Wasium, *Bahr* and *Nicklès*, 116.
Water in Paris, 443.
Watson, *J. C.*, on Comet VI, 1863, 294.
on Eurynome, 140.
Wehrauhe, on cyanid of phosphorus, 269.
Whelpley, *J. D.*, on mechanical and chemical treatment of gold and other metals, 401.
Whitney, *J. D.*, reports on California Survey, 82, 427.
on heights of mountains in N. America, 81.
Wiederhold, on arseniuret of hydrogen, 117.
Winchell, *A.*, on fossils of Potsdam and Lake Superior sandstones, 226.
Wöhler, on compounds of silicium with oxygen and hydrogen, 120.

ZOOLOGICAL WORKS, etc., notices of:—
Elliott, Tetraoninæ, 437.
Holbrook, Ichthyology, 89.
Lea, on the Unionidæ, 436.
Verrill, Polyps and Corals of Mus. Comp. Anat. Cambridge, 437.
See further, *Geological*.
ZOOLOGY.—*General*.
Cephalization, as a basis of classification, *Dana*, 10, 157.
Embryology in classification, 19, 184.
Vertebrates.
Amphibians, position of, among Vertebrates, *Dana*, 184.
Carnivores, relations of, to Herbivores, 159.
Cetaceans, relations of, to Herbivores, 161.
Herbivores, classification of, *Dana*, 159.
ZOOLOGY.—*Vertebrates*.
Man, cephalization in, 162, 179.
Edentates, 182.
Megasthenes and Microsthenes, 181.
Articulates.
Diptera of the Amber-fauna, 305.
Insects, classification of, *Dana*, 13.
Insects, Carboniferous, of Illinois, *Dana*, 34.
Molluscs.
Pteriidæ (or Aviculidæ), *Meek*, 212.
Radiates.
Tubularia not parthenogenous, *Clark*, 61.
Protozoans.
Rhizopods of the Azoic, or Laurentian, 272, 431.
